SuiteLanguage™
A SuiteFactory Module for International Language Management
You can Create, Modify, Save and or Import any Language or Dialect
Part of an Integrated Family of SuiteFactory™ EventAware™ Modules
For Windows 7™/Windows XP™ including Terminal Server Support

SuiteLanguage™ is a SuiteFactory Module Designed so a User of SuiteFactory can Create, Modify, Save, Import and or Export any Language or Dialect of any Country. You don't have to recompile the changes as they are instantly available after modification.

SuiteLanguage provides the ability to have the Original Text Side by Side with the New Text so there is no confusion with the changes you are making! No matter what you can always go back to the original within minutes!

As an example you can change the name of any SuiteFactory™ Menu to suit your tastes and the Language Management Module will save these changes to your local system so if you would like to create a whole new local Language and package the "New" Language so you can email this Language Version them back to CCI for inclusion into its future releases.

SuiteLanguage™ For Creating a Local Dialect and or Modifying your Language Easily!

Need Support for International Languages?
Just Want to Tweak a Menu or Two? You
can Tweak an Existing Language or Create a
new Language with SuiteFactory!

Features:

Configuring A Language Dialect	<p>SuiteLanguage's™ Configurable Settings Allows:</p> <ul style="list-style-type: none"> • Displaying Menu Normally • Displaying Menu as Resource ID(Useful for Menu & Text Searches) • Displaying as English Menus • Displaying as English with Resource ID(Useful for Menu & Text Searches) • Displaying as Local Language with English • Displaying as Local Language with English with Resource ID(Useful for Menu & Text Searches) <p>Note: A Resource ID is used for looking up a Menu or Text using SuiteLanguage!</p>
