29 years Providing Working Solutions for Manufacturing!

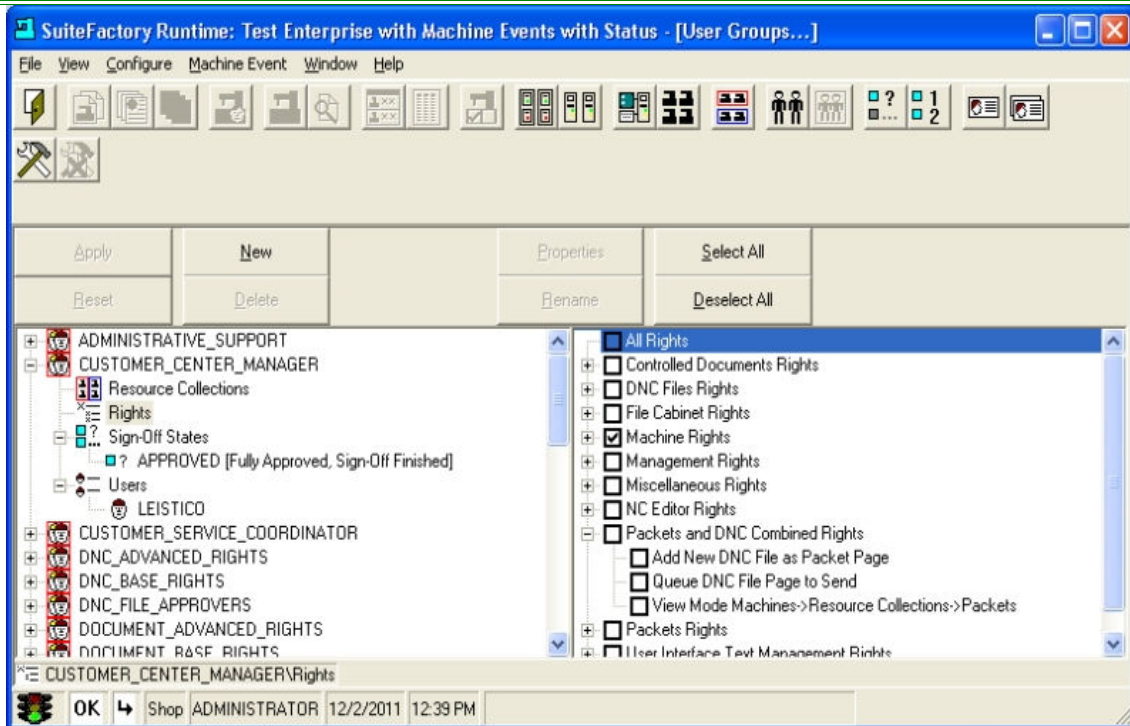

SuiteSecurity™
A Complete Enterprise Security Base Module
Includes Configurable Security for Access to N/C Files, Documents, & SuiteFactory™ Modules
Includes Configurable Events with Event Triggers for Capturing File & Document Changes
Part of an Integrated Family of SuiteFactory™ EventAware™ Modules
For Windows™ 7/Windows™ XP including Terminal Server Support

SuiteSecurity™ allows setting any Level of Security that your company requires by providing Customer Definable User Groups, User Group Rights(over 130 Rights in 11 different categories), Users, Logins & Passwords, Virtual File Cabinets, Resource Collections, restricted "Views" in User Configurable Combinations. These will provide any level of Security that a Company may require.

Set the desired Security Level by Creating the required number of User Groups in your Company, setting User Group Rights, adding any number of Users, Resources & Sign-Off States to these User Groups. Users inherit their combined User Group Rights based on the User Groups they belong to which allows them to Access SuiteFactory's Specific: Features, Data, Resources, Information, Files, Documents, etc.

In order to meet ISO9000 Document & File Change Security, SuiteSecurity Captures any Document Change Events(Customer Configurable) that are generated when making Changes to Files & Documents. You can also activate the "Reason Required Feature" which will require User to enter a reason(s) for changing any Documents & files. When the Event is triggered a User is presented with a Customer Configurable List of Change Reasons and an input screen to enter a brief description of these Changes. You can then use SuiteReports to generate a detailed Document & File Change Report!

SuiteSecurity™ Securely protecting your Database Configurations, Files, Documents, Packets, Data & Information!

Standard:

<p align="center">SuiteSecurity™ User Login/Logout And Passwords</p>	<p>SuiteSecurity Provides your Company with Secure User Logins:</p> <ul style="list-style-type: none"> • Administrators Creates User Names • Administrators Creates User Passwords • Administrators Creates User Group Login/Logout Timeouts • Administrators Selects User Group Categories and Configures Categories' Rights • Administrators Creates any number of Users • Administrators Creates User Groups with Rights that Control User's Access • Administrators Can Configure over 130 Rights in 11 Different Categories
<p align="center">SuiteSecurity's™ Basics</p>	<p>SuiteSecurity's™ Basics Include:</p> <ul style="list-style-type: none"> • Login & Password Protection • Creatable User Groups with 11 Different Rights Categories • Creatable Users to Associate with User Groups • Creatable Approval Sign-Off States to Associated with User Groups • Creatable Resource Collections to Associated with User Groups • Note: Resource Collections contain N/C Files & Packets and are associated with Machine Tools that have access to these N/C Files! • Creatable Machine Tools which are associated with specific Resource Collections • Over 130 Cross Integrated Individual Rights • Customer Creatable Document/NC File/Packet Change Reasons • Customer Activated Events for Document Change Events • Virtual File Cabinets Access • Reports for Verifying All Documents/NC Files/Packets Change Histories
<p align="center">User Group Rights Categories</p>	<p>SuiteSecurity™ 11 User Group Rights Categories:</p> <ul style="list-style-type: none"> • All(130 Rights) • Controlled Documents(25 Rights) • DNC Files(52 Rights) • File Cabinet(5 Rights)

	<ul style="list-style-type: none"> • Machine(8 Rights) • Management(8 Rights) • Miscellaneous(6 Rights) • NC Editor(2 Rights) • Packets and DNC Combined(3 Rights) • Packets(25 Rights) • User Interface Text Management(6 Rights) <p>Note: By selectively setting Rights in these various Security Categories you control the "Access" Level of Users in this User Group. Couple this with juridical use of Resource Collections & Sign-Off States you have complete and full control of Security for all of Documents, Files & Data.</p>
<p style="text-align: center;">Configurable Change Reasons</p>	<p>SuiteSecurity™ Create Document/NC File/Package Change Reasons</p> <ul style="list-style-type: none"> • Create New Reasons • Retire Old Reasons • Recover Old Reasons • Sort Reasons By Id • Manually Sort Reasons <p>Note: A Company can create any number of Specific "Document Change Reason Forms" from which a User can select when prompted by SuiteFactory to Events that occur when making Changes, Deleting, Viewing, etc. to Documents/Files. These Forms also provide an area for entering an explanation for these "Changes" and is then stored in the History Change Database.</p>
<p style="text-align: center;">Change Events Activation</p>	<p>SuiteSecurity™ Activate Specific Change/Reason Events</p> <ul style="list-style-type: none"> • Activate any of 77 Events for DNC Files Events • Associate a Limited Set of your Change Reasons to a Specific Event for a DNC File • Activate any of 23 Events for Controlled Documents • Associate a Limited Set of your Change Reasons to a Specific Event for a Document • Activate any of 21 Events for Packets • Associate a Limited Set of your Change Reasons to a Specific Event for a Packet <p>Note: A Company may not want to have SuiteFactory Prompt them everytime an Event happens. SuiteSecurity allows you to select Events to which a User is to Respond. Note however that even if a User isn't required to respond to an Event this Event is still recorded in SuiteFactory's History Database.</p>
<p style="text-align: center;">Secure Virtual File Cabinet</p>	<p>SuiteSecurity™ User Group Secure File Cabinets</p> <ul style="list-style-type: none"> • Create any number of File Cabinets • Create any number of Draws, Folders, Sub-Folders within a File Cabinet • Establish Security on any File Cabinet, Draw, Folder or Sub-Folder • Drag, Drop & Move File Cabinets, Draws, Folders & Sub-Folders • Turn-On/Off File Cabinets views as needed • Securely Drag & Drop Documents/Files from with-in or external to SuiteFactory <p>Note: Optionally using SuiteFactory's Virtual File Cabinets provides another Level of Security by restricting "Access" to Files, Documents & Packets that are contained in a File Cabinet Draw to which selected Users have access Rights. Virtual File Cabinets also provides a Sophisticated Management Tool for controlling all of a Company's Files/Documents/Packets.</p>
<p style="text-align: center;">Resource Collections</p>	<p>SuiteSecurity™ User Group Specific Resource Collection(s)</p> <ul style="list-style-type: none"> • Associate with N/C Files • Associate with Machine Tools • Associate with Packets • Resource Collection Security Properties • Securely Drag & Drop NC File(s) from with-in or external to SuiteFactory <p>Note: For Users who need access to N/C Files, Packets & Machine Tools, Resource Collections not only provide a way to segregate the Correct "N/C File to Machine Tool Relationships" but provide another Level of Security so only those Users who should have "Access" to these Files, Packets & Machine Tools do have "Access".</p>
<p style="text-align: center;">Sign-Off States</p>	<p>SuiteSecurity™ User Group Specific Sign-Off States</p> <ul style="list-style-type: none"> • Sign-Off States Associate with Sign-Off User Groups thus Users • Sign-Off Flow Chart that contain Sign-Off States • Sign-Off Flow Charts that can be Associated with DNC Files • Sign-Off Flow Charts that can be Associated with Controlled Documents • Sign-Off Flow Charts that can be Associated with with Packets <p>Note: For Users who are restricted to accessing to N/C Files, Documents & Packets that have reached at a particular Approval Level the use of Sign-Off States provides another Level of Security.</p>
<p style="text-align: center;">Putting All Together</p>	<p>SuiteSecurity™ How it Works</p> <p>Security starts with the User Group(s) in which a particular User(s) belong(s). The User(s) inherits the Specific Rights Configured from the 11 Categories for each of the User Groups within which they belong.</p> <p>Using N/C Files as an example we note that even though a Particular User(s) may have Specific Rights to Manipulate N/C Files if this User is not part of a User Group that has access to the Resource Collections which contain the N/C Files they need, they will not be able to "Access" them.</p> <p>If a User needs to Communicate with a Particular Machine Tool they will not only need access to the Resource Collection containing the required N/C Files but the Machine Tool will need to be Associated with this Resource Collection.</p> <p>Further if Virtual File Cabinets are used then this User must also have Rights to a Particular File Cabinet associated with the Files to which they need Access.</p> <p>Further if Approval and Sign-Off is used the only way a User can access an Unapproved NC/File is to be part of a User Group that is associated with a Sign-Off State where that File is in a Pending Approval State. See SuiteApproval for more details!</p> <p>You can have any Level of Security from "None" to "All" as dictated by your Company's Policies.</p> <p>Note: Documents' and Packets' Security is handled similarly.</p>
