SuiteThirdPartyTools™
Allows Creating Secure Communication's Channels to External Applications
A Database-Driven Tool Kit For Attaching to External Applications
Part of an Integrated Family of SuiteFactory™ EventAware™ Support Modules
For Windows 7™/Windows XP™ including Terminal Server 2003/2005/2008 Support

SuiteThirdPartyTools™ supports Creation of Secure Third-Party Communication's Channel to External Applications allowing these Applications to access Files and or Documents from SuiteFactory's™ Database so these Files can be: Viewed, Edited, Copied, Renamed, Saved, etc. So you can keep using these Specialized Applications like they are part of SuiteFactory.

Any Documents of Files that are modified by these Specialized External Applications can be securely managed & checked back into SuiteFactory's™ database providing the same control as any other File and or Document stored in SuiteFactory's™ database.

Using SuiteThirdPartyTools™ in combination with SuiteFactory's™ ISO9000 Modules provides Revision Control, Approval Control, Event Capture and Creation of "Birth to Death Histories" of all Files & Documents.

SuiteThirdPartyTools™ A Secure Communication's Channel to External Applications
